WEB CONFERENCING THAT MAKES SENSE
Integrated with Zultys award winning MXIE™ Unified Communications client

Outstanding Value for Your Business

The **MXmeeting**™ appliance provides productivity and bottom-line boosting solutions in one unit:

- **Web conferencing** – sales presentations, product demos, interactive collaboration.

- **Web seminar** – seminars for view only attendees with no client or agent to install. Viewable in any browser.

- **Webcam server** – up to 4 webcams can join in for live video interactive presentations.

- **Remote support & access** – remote access and support for PCs and Macs anywhere.

- **Remote print and file sharing** – print documents remotely to anyone participating in a meeting session and easily transfer files.

4-party Integrated webcam video conferencing

You own it, you control it!

MXmeeting is a web-conferencing platform that fully integrates with the Zultys MXIE Unified Communications client application. You can launch a multi-party web-conference with a touch of a button from your Mac or PC. The feature-rich MXmeeting appliance integrates into your network and allows attendees to join a collaborative web conference without requiring special software to be installed on their computer. Click to start an interactive Web Conference with 4-point Video, seminar or remote desktop support with real-time webcam video…all with or without a free 100 port Voice Conference Bridge.*
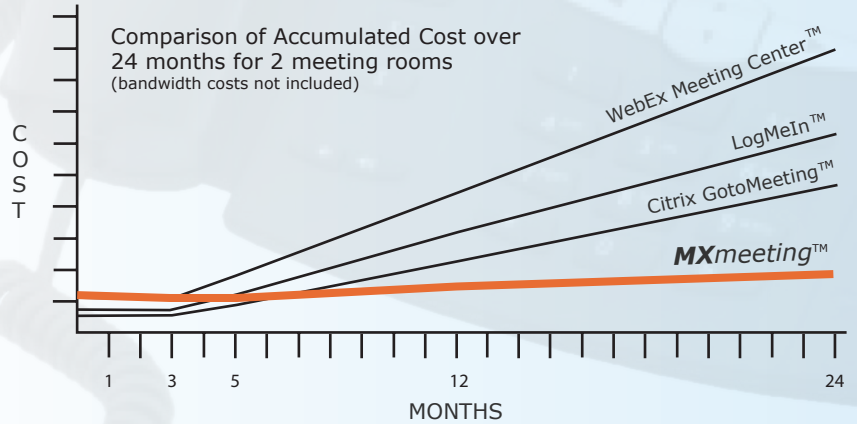

You can brand the system and integrate it with your applications and websites. You can place "Host Meeting" and "Join Meeting" buttons on any external/internal web page, or windows based applications such as audio conference or CRM systems.

The appliance can be placed outside, behind or in the DMZ of your Router/Firewall.

Capacity Range:

MXmeeting Appliance	Included Capacity	Maximum Capacity
M200	2 Rooms, 10 Users	4 Rooms, 20 Users
M500	5 Rooms, 20 Users	20 Rooms, 100 Users

Note: General bandwidth requirements may vary depending on screen resolution, compressibility and use of video.**

UNIVERSAL ATTENDANCE
Anybody can join the meeting

The amazing Universal Attendance technology enables anyone with a modern browser, on any platform, to join a meeting. No download of any kind is required. The attendee is "view only" and can see the presenter's screen in a browser with speed similar to the fully interactive client attendee that requires a download.

Just think - no firewall, antivirus products, lockdown computers, or unsupported platforms can keep your key meeting participants from joining. And, it is fast – just 5 seconds to join. No more waiting 10 and 15 minutes to start your meeting while everyone works to get clients downloaded and connected.
